

Gaurav Gupta
Associate Product Manager

I'm an AI Product Builder in Bengaluru, India. I'm passionate about crafting beautiful yet functional systems and websites with a focus on accessibility, performance and interactivity. I am now focused on contracting with small craft-focused teams and agencies.

Previously at KPMG, on operational risk controls and an evidence-gated decision engine.

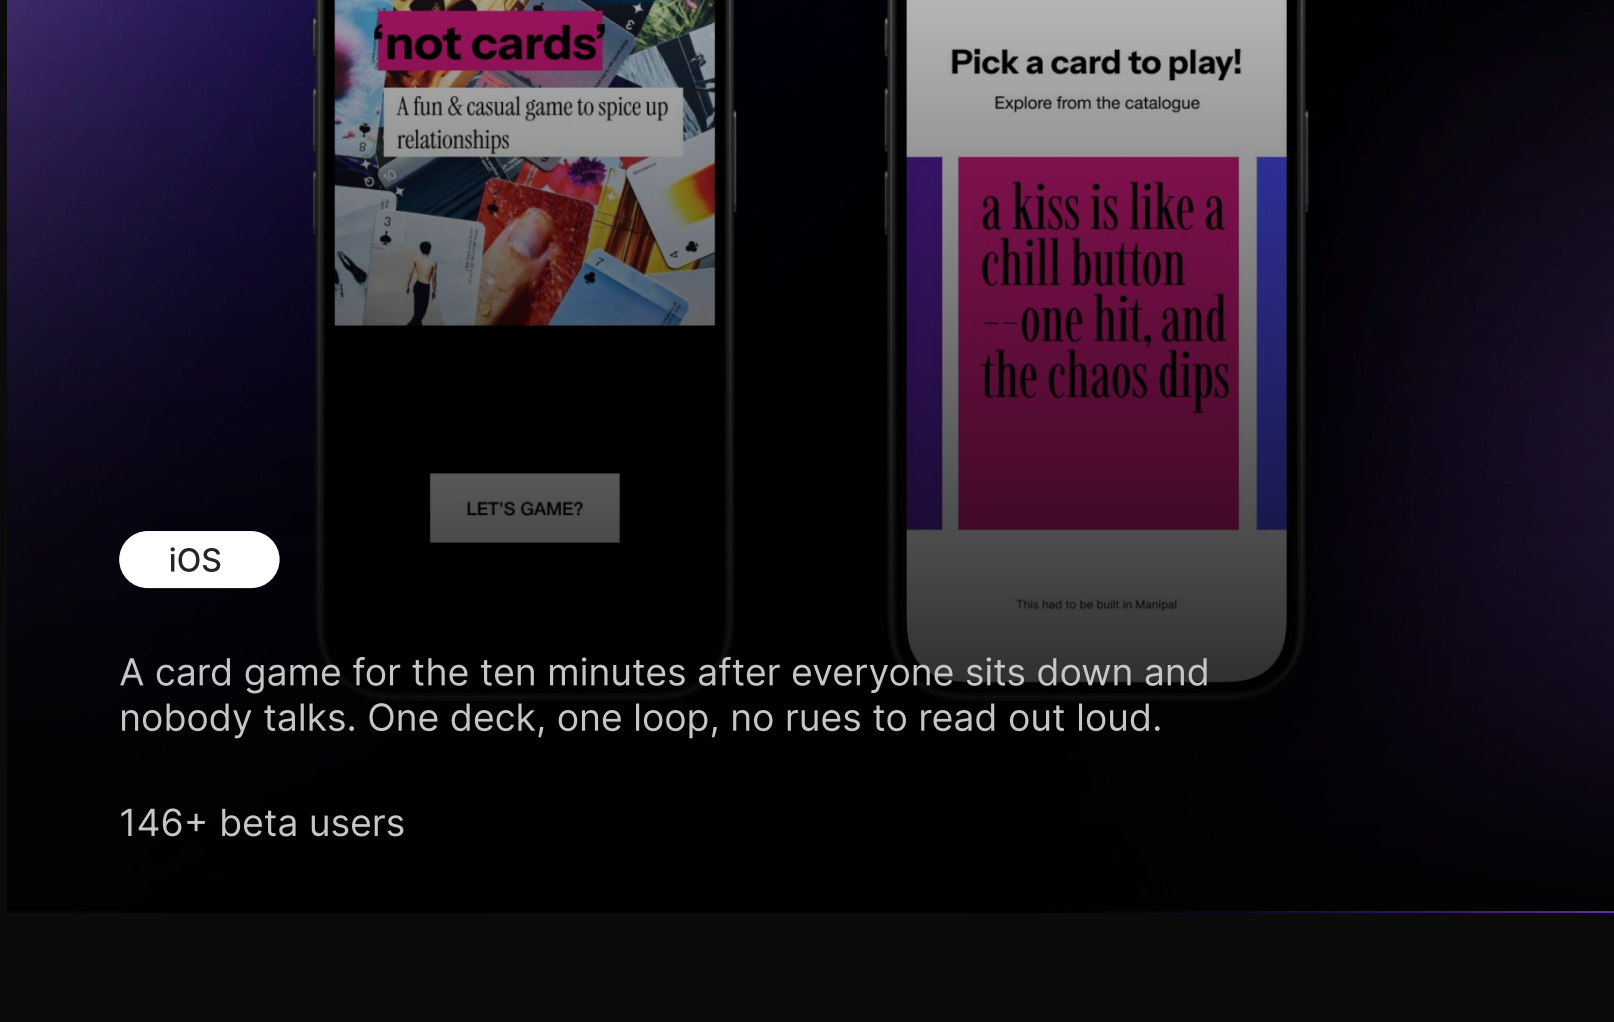

I am currently working as a Designer & Developer on: [Wylde](#), an app for fun times.
Also built : [Lucky Day](#), [Sachetana](#). I find the friction, build the smallest thing that removes it, then check whether it worked.

Selected Work

01 Sachetana

02 Wylde

03 Lucky Day

Work is the story

01 Discovery

02 Delivery

03 Distribution

04 Iteration

Grew up in Manipal taking things apart. Everything worth building since has needed more than one pair of hands.

Manipal, second year. The go-kart team had a car, 15 people, and a competition date. They put me on design, marketing & budgets.
I managed sponsors, budget, calendar, and a workshop full of engineers who each knew their subsystem deserved the extra week.
8 months later the kart ran at Buddh International Circuit, the track India built for Formula 1, and we finished 4th overall.
None of that came from me being the best engineer in the room; it came from getting the room to agree what "done" meant before anyone cut metal. I've used that on every project since.

2026July	-----	Risk Advisory, GRCS @ KPMG
2025-2026	-----	Designer + Developer @ MIT x KMC Manipal
2025Feb	-----	Designer @ MIT Manipal
2022-2023	-----	Management @ Team Karting Manipal
2022Sept	-----	Marketing @ Vennbrd
